Andrew,

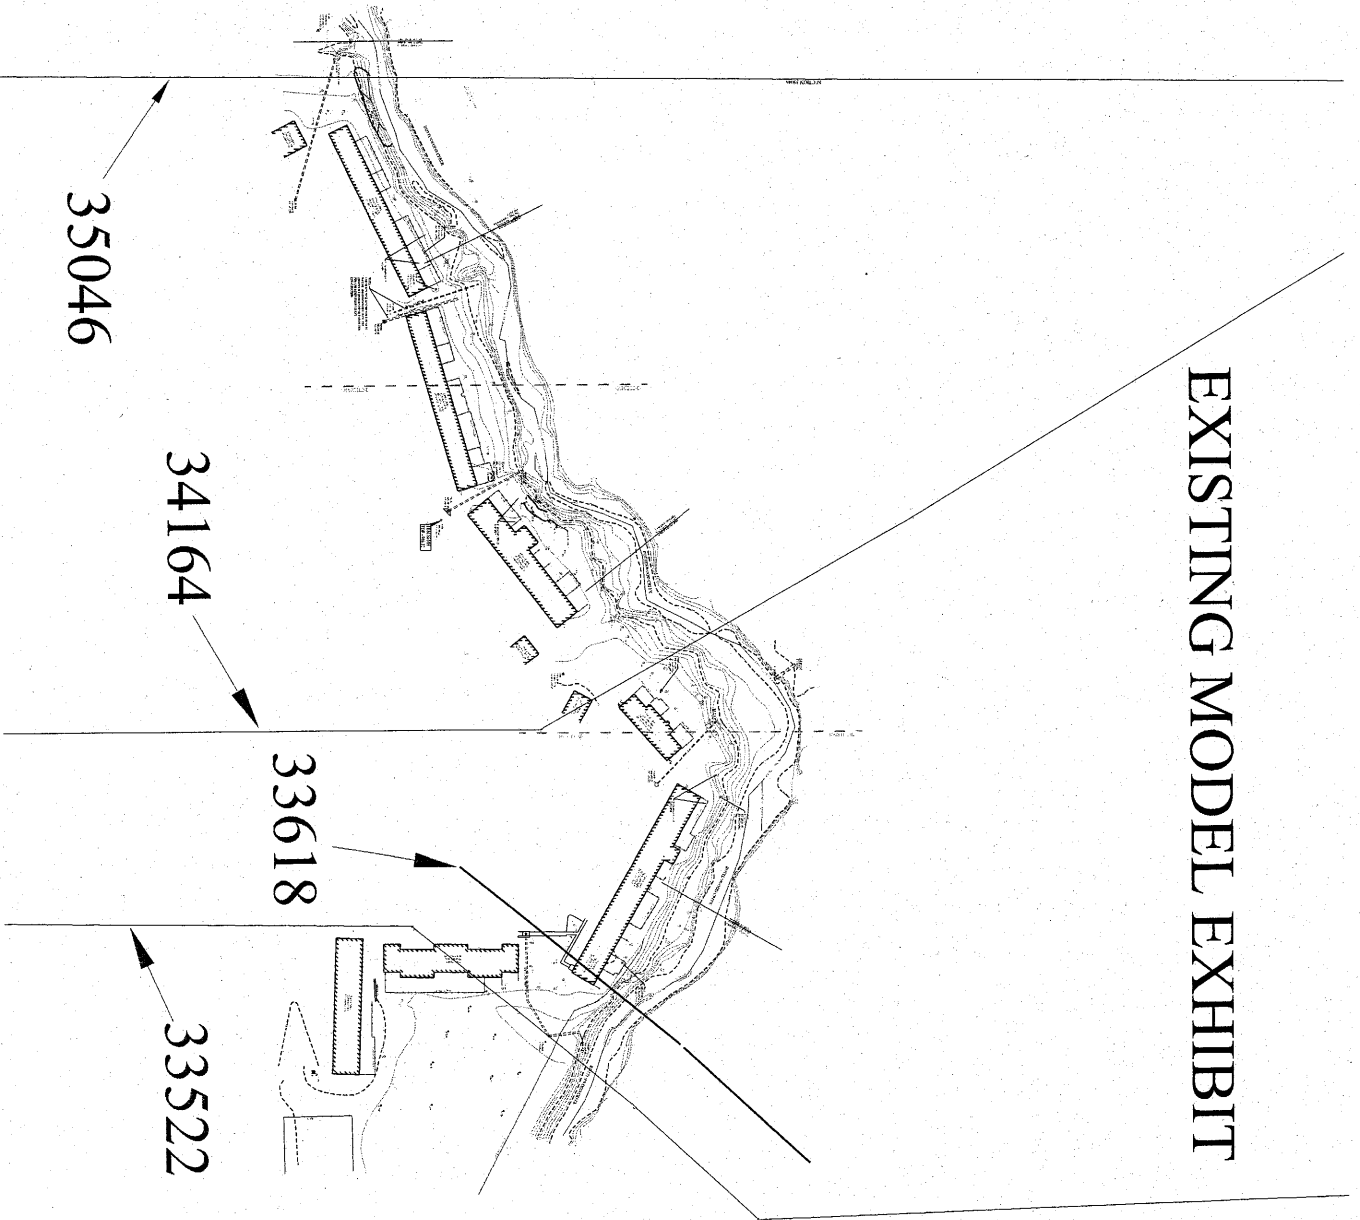

Attached is the No rise report for the slope stabilization on Rottenwood creek for the Ashborough Village condo project listed above. Also is the Army corp. notification that was submitted and approved and has been confirmed to still be valid by Bob Kendall. We have been notified by the state that as soon as the required advertising for the buffer variance is completed that we should be approved to move forward. Can you please review this data to confirm that it will give you everything you need to sign off on the project listed above?

Regards,
Mark G. Lee, PE, RLS
